

### **Poker Page Meeting Notes:**

- Director: Audrey Brown
- Designer: Bernice Mai

Zoom recording:  video1316426238.mp4

### **Concept:**

- Have a website for Texas Hold 'Em, can learn about poker while making the site
- Reference the Content Outline for specifics but can also look at Brief for example vibes of images
- Different page topics are subcategories of the Wiki page
- Flexible topics, can write about other topics

### **Brief:**

- Flexible but try to be beginner-friendly to demystify idea of poker being complex
- Don't have a super strong stylistic preference, just have fun with it and can reference examples for inspiration (e.g., colors to use, ambience)
- Grand Casino example is a bit less literal, up to Designer

### **Other guidelines:**

- Probably an equal emphasis placed on desktop + mobile view as users could be learning to play from their laptop (e.g., if they're also playing practice poker online to learn which would be convenient) or mobile (maybe they're on the go)
- Not a specific emphasis on any topics but make sure content isn't overly complicated or complex to avoid intimidating new learners
