Project Title: [Texas Hold 'Em](#) Website

My website will span across a few different pages (as listed below) and users will explore content by interacting with a standard navbar. Additionally, I would like to incorporate aesthetic photography, text styling, and page layout mechanisms to help make my website exciting for users to navigate as well as engaging and educational.

There is a lot of content on the Texas Hold 'Em Wikipedia page so ultimately, my website will aim to highlight the most important aspects of the game (e.g., purpose, history, rules).

1. **HP**: Feature a brief overview about the game, some eye-catching imagery, and a blurb regarding my website's "About" (e.g., website purpose).
2. **History and Popularity**
3. **Betting Structures**
4. **Play of the Hand and Showdown**
5. **Hand Values**
6. **Sources**: List any sources utilized (including the Wikipedia page and photography sources), as well as provide any other needed credit.
